

shine™

Bright new thinking

With Shine™ we set out to build the best essential hearing instrument in its class. The result is a unique, affordable hearing instrument, with Unitron signature features and flexible fitting options that put truly effective hearing within reach for more people.

 **unitron™**

TriVantage features

Shine includes a trio of technologies traditionally reserved for more advanced hearing instruments.

Speech enhancement LD

Enhances the audibility of soft speech sounds while not making loud sounds more intense.

AntiShock™

Identifies and controls sudden impulse sounds while preserving speech clarity.

Adaptive directional microphones

Improves speech understanding in noisy environments.

Astonishingly effective, surprisingly affordable

Some companies make their hearing instruments value priced by scaling back on features. At Unitron, we prefer a different approach. We built a unique essential hearing instrument, making our signature features accessible to more people.
