hearing

From enjoying simple pleasures to sharing time with friends.

Congratulations! You've just taken your first step towards better hearing. Your listening needs are as unique as your journey through life. That's why the Next™ step you take is an important one.

Wherever life takes you. Next™.

Enjoy your favorite activities

Your listening needs vary throughout the day.

2 manual programs – enables you to manually choose between two customized programs that match your listening activity, whether a phone conversation, quiet discussion or a television show.

Engage in conversation

Background sounds distract you.

Fixed directional microphone – lets you focus on conversation and other sounds directly in front of you while reducing continuous background noises behind you.

Minimize the shock of sudden loud noises

Unexpected sounds like a closing door can cause discomfort.

AntiShock™ – reduces the extra loudness of sudden, intense noises while ensuring a consistent level of clarity in speech.

Setting the standard with purpose-driven features

Next E offers a great set of purpose-driven features including **noise reduction** and the most sophisticated **feedback management system**. It is built on the world's most advanced digital sound processor. Next simply sounds better.

Next has the right style for you.

Your hearing healthcare professional will help you select a style that's right for you. Choose from a wide range of colors and options.
